

# Accessing LAR-IAC 3 data

---

The new eGIS database server (EGISDBP1) is the new way to access the LAR-IAC 3 data. Connection information is below.

Step 1: In ArcCatalog, under **Database Connections**, Click “Add Spatial Database Connection”

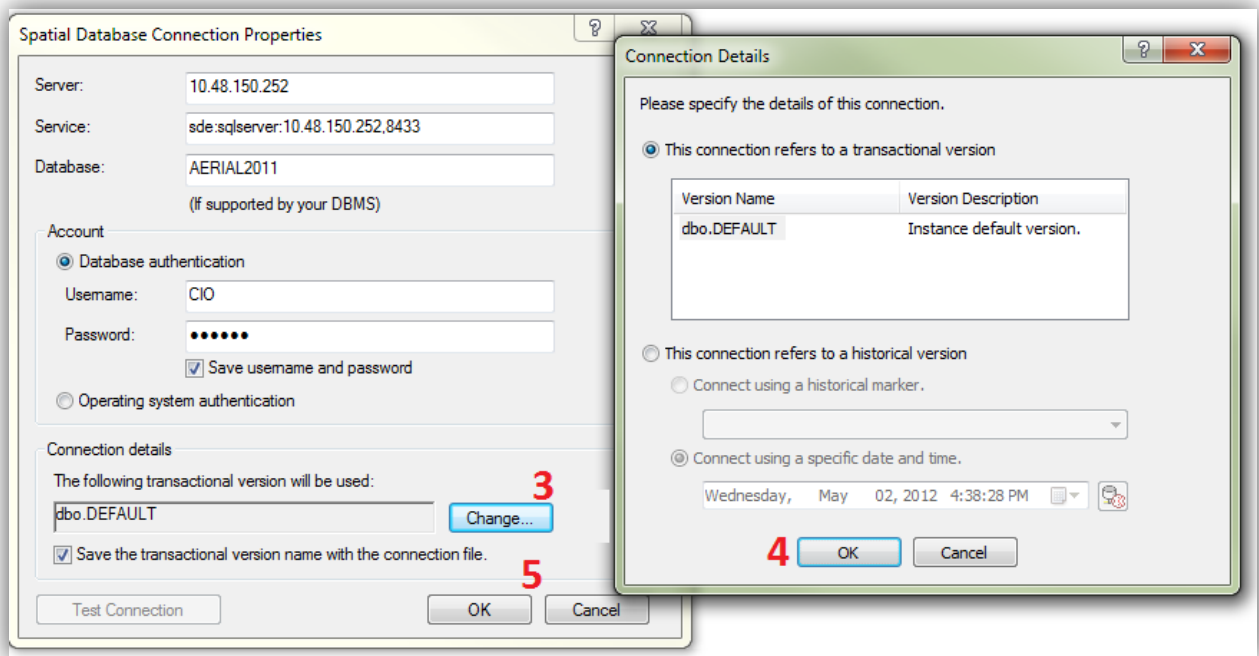

Step 2: Type in the information that you see here:

Parameter name	You enter
<b>Server</b>	10.48.150.252
<b>Service:</b>	sde:sqlserver:10.48.150.252,8433
<b>Database:</b>	AERIAL2011
<b>Username</b>	Provided by ISD eGIS to your GIS Manager
<b>Password</b>	Provided by ISD eGIS to your GIS Manager

Step 3: Click on the “Change Button” next to “Connection details” – see item 1 below.

Step 4: You will see the dbo.DEFAULT version already selected. Click OK.

Step 5: Click OK – you are now connected and can use the AERIAL data

The Aerial database contains three items:

Contents		Preview	Description
Name		Type	
	AERIAL2011.LARIAC.LARIAC3_1FOOT_NF	SDE Raster Dataset	
	AERIAL2011.LARIAC.LARIAC3_4INCH	SDE Raster Dataset	
	AERIAL2011.LARIAC.LARIAC3_DATEFLOWN	SDE Feature Class
